BACKGROUND:

The Kawa Policy was developed as a service level document in 1999. It was due for review in 2002. This review has to date not been completed.

It is recommended that this service level policy be archived for two reasons:

1. The DHB policy and procedures framework allows for policy to be made only at a DHB level.
2. It is not necessary for this policy to exist at a DHB level because its development has been superseded by the establishment of the Maori Health Runanga and the Cultural Safety and Koha policies.
